

# micro:bit glove pocket pattern

1. Cut out the pattern on this page. It should measure 3.25" wide and 7" from point to bottom.
2. Use the pattern to cut out as many pockets as you need (one pocket per glove).
3. Fold the bottom of the piece to the dashed line. Sew a narrow (1/8"-1/4") seam along each long side. Turn the seams to the inside of the pocket.
4. Attach hook-and-loop fastener dots to the flap and the pocket. You can use adhesive fastener or sew-on.
5. Sew the pocket to the back of the glove. You could also use more hook-and-loop fastener instead.
